Importance: High

Hi John,

The following is the weekly for the Exide and Central Metal visit. I also included a couple of photos.

Exide and Central Metal Site Visit and Community Outreach - Los Angeles County, CA On July 20, 2022, SEMD Division Director Mike Montgomery and DTSC Director Meredith Williams toured the former Exide facility and the ongoing residential cleanup in the nearby communities. The purpose of the site visit was to learn about the work DTSC is performing and continue the partnership, collaboration, and communication to implement the investigation and cleanup of the facility and the surrounding area. The State has requested that EPA list the Former Exide Facility and surrounding industrial and residential areas contaminated by past facility operations on Superfund's National Priorities List.

In addition, at the nearby Central Metal site, Mike and the Superfund team met with one of the stakeholders, Communities for a Better Environment (CBE) to update them on residential site assessment sampling starting on August 1st. Since CBE represents community interests at both the Exide and Central Metal sites, Mike and Team heard directly about concerns and impact of lead contamination in the communities surrounding both sites. Contact: Chip Poalinelli 2-3390, Matt Mitguard 2-3096, Ashley Mrzljak 2-3813
